Bootstrap
Ruby on Rails
React.js
Sass

EDUCATION

Bachelor of Science in CS & Mathematics — **EXPECTED 2017**
University of Illinois @ Urbana-Champaign

EXPERIENCE

CS225 (Data Structures) Teaching Assistant — **2015**
- Assisted course instructors in providing a great experience for the enrolled students.
- Held office hours & lab sections during the week to assist students with MPs & exams.

PROJECTS

Perkt (HackIllinois Spring 2015) — *perkt.io*
- Created a security software/hardware hack that utilized facial recognition with Python/Flask/Arduino.
- Was in charge of creating the web interface, although there was not enough time to make it a web app

Odyssey (Android App) — *cjang5/odyssey*
- Created a location-based photo sharing app (in progress) in Android for SpartaHack 2015 with a team of 4.
- Implemented the camera, camera UI, and app UI in Java, as well as all design/front-end responsiblities for the app.

Strike! (Web app) — *cjang5/bowling-jackpot*
- Created a "fantasy bowling" web application where users can create leagues for their bowlers and win "cash jackpots"
- Used CSS/JS for nice, responsive front-end design and used the provided NextCapital API to handle the backend

Mosaic-O-Matic — *cjang5/mosaic-o-matic*
- Created a program in C++ that "mosaic-ifies" an inputted image.
- Utilized the kd-tree data structure and the quick-select algorithm.
